

Is it money? Is it the environment?

What drives mobility choices? Even with more commuting alternatives popping up in our local cities, there is still a heavy dependence on private cars. Therefore, understanding the motives influencing how people decide to commute is vital for developing our local mobility needs and a significant factor in driving the transition to greener options.

According to data from the World Economic Forum, 70% of the world's population will be living in cities by 2050. In the next five years, there will be an explosion of mega-cities with more than 10 million people, roughly 50% more than today. This massive urbanization will pile on our cities' existing problems, such as urban sprawling, transportation options and reducing inequalities, and fostering innovation. But by far, the biggest challenge we will face is reducing the environmental impact.

A recent study published by the C40 Cities, a Climate Leadership Group of 97 cities around the world that represents one twelfth of the world's population and one quarter of the global economy, indicates that public and private transportation can represent up to 20% of city greenhouse gas emissions. Positive incentives to drive behavior change are likely to be effective. Still, for them to work, planners need to understand users' preferences, values, and interests, how these evolve, and any differences between geographies and generations. Jumping out in front of these trends, PART works diligently to gather data and work with our local Metropolitan Planning Organizations (MPOs) and citizens to find solutions. We are doing our PART to stay on top of connecting our local communities in ways that save our neighbor's money and protect our environment. Please do your part and check out some of our mobility options, such as our Vanpool Program and our PART Express Routes. For more information visit PARTnc.org

Explore With Express.

Route 22 SW Sandy Ridge Area Express is one of PART's early morning to late night work routes. This service runs 6:15am-9:15pm out of the Coble Transportation Center, getting riders to and from work on time. This route has 12 scheduled stops and offers two deviated stops. Deviated stops are not planned but can be made through reservation by contacting our call center at 336-883-7278. For more information, go to PARTnc.org/338/Route-21.

SW SANDY RIDGE

MONDAY - FRIDAY

Call today and let us help you plan your trip!

The Piedmont Triad Resources Call Center is a one-stop shop where you can get local transit questions answered. The Call Center answers phones for PART, High Point Transit System, and Davidson County Transportation System. With one call, our friendly staff can answer your questions about PART's Express bus service, including routes, schedules, passes, fares, real-time bus info, and how to link to our regional transit partners. In addition, if you're trying to connect in the Piedmont Triad area, our Call Center representatives can update you on services and schedule shuttle and deviated stop pickups.

Are you looking for other ways to travel around the Triad? Our Call Center can help you join PART's Vanpool Program, where we leave the driving up to you. Or we can connect you with Share the Ride NC to find a carpool match! Whatever your transportation needs are, you can call **336-883-7278**, and we can help you. You can also visit us on-line at **PARTnc.org**. Call center hours are Monday-Friday, 7am-8pm, and Saturday, 7am-7pm.

Real-time Bus Tracking ... its a thing!

PART is transitioning our Automatic Vehicle Locator (AVL) system that assists riders with trip planning and understanding where our vehicles are in real-time. Currently, we are using Transloc; our new platform will be GMV. This process will take several months and went in testing on 08-12-2022.

During this transition, we may experience disruptions with Transloc which will remain our platform until the end of the conversion. Throughout the transition, PART will provide updates and information related to the new platform on our website and updates on any disruptions. We encourage our riders to visit **PARTnc.org** for all of our current routes, schedules, and updates.
