Cook, Frankie Tran, Taegyu Kim, Soon Chung, Yuan Zhou, Suzette Morales, Derek Jaworski, Anthony Fucci, Wannetta Mallette, John Hanes, Jesse Casas, Shawn McCloskey, Scott Rhine, Michael R. Abuya, and Johanna Cockburn.

Highlights

1. Final project presentation from Westat on Triad Travel Counts.
 2. Decision to use trendline method for determining Sf vs. MF split. Agenda topic
-

Agenda topic **Presentation** | Presenter *WestatTeam*

Triad Travel Counts: The Westat team gave a final presentation on the project and thank everyone involved.

Agenda topic **Presentation** | Presenter *John Kim, PhD*

Growth Control Totals for Sub-Regions: Last week two methodologies, average and trendline, to determine the split between single-family (SF) and multi-family (MF) growth were presented and discussed. Each MPO agreed to use the trendline method. WSMPO expressed concern over the office employment total. City-County Planning felt it was high. Kirstner suggested looking at the amount that is allocated. If it is close to the planning's number, then all is good. If the allocation is high it may be possible to lower it through modifying some place types when future growth will take place.

End of Meeting.
